About the Brunswick Terminal Station Upgrade December 2014

The Brunswick Terminal Station has been in operation on King Street since 1939.

The upgrade of the Brunswick Terminal Station is helping to secure electricity supply to Melbourne's central business district and inner suburbs, and will cater for another 65,000 customers in Brunswick, Brunswick West, Northcote, Carlton, Fitzroy and Collingwood.

The upgrade involves the installation of state-of-the-art electrical equipment housed in architecturally-treated buildings, while buildings no longer required have been removed. The upgrade is scheduled for completion in 2016.

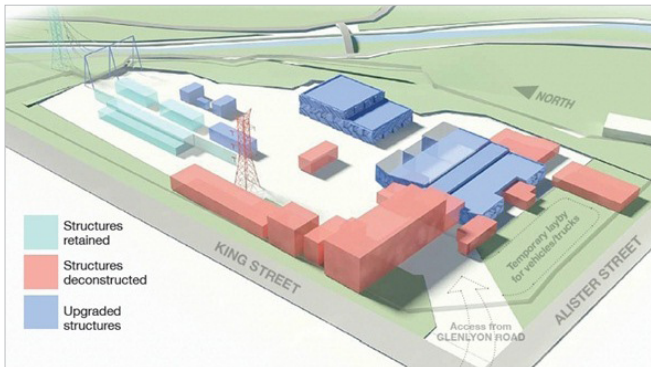

The new technology, building designs and extensive landscaping will reduce the footprint of the site, and improve the station's visual appearance and environmental contribution to the Merri Creek corridor.

About AusNet Services

AusNet Services provides essential services across three Victorian energy networks - electricity transmission, electricity distribution and gas distribution.

As the owner and operator of our state's electricity transmission company, AusNet Services is responsible for providing a reliable supply of high voltage electricity for all Victorians.

Brunswick Terminal Station upgrade

Schematic of the Brunswick Terminal Station upgrade

All work at the Brunswick Terminal Station is carried out in accordance with the Construction Environmental Management Plan and requirements set by the Environment Protection Authority (EPA).

Working hours

Normal working hours are from 7am to 6pm Monday to Friday and 7am to 1pm Saturday.

Please note that some vehicles may enter and leave site outside of these hours as part of our usual operational requirements.

Construction traffic

We are continuing to use the existing access route along Nicholson Street and Glenlyon Road as agreed with Moreland City Council.

A Traffic Management Plan (TMP) is in place to minimise inconvenience. The TMP restricts construction vehicle movements, allows for monitoring and enforcement of speed limits and designates parking areas on site.

Noise

Above ground activities unavoidably generate noise. We are doing everything practicable to keep disturbance to a minimum. Noise monitoring measures are in place and we are in compliance with the EPA noise control guidelines.

Αγαπητέ γείτονα, Αυτό το έγγραφο αναφέρεται στα έργα αναβάθμισης του σταθμού Brunswick Terminal που θα αποπερατωθούν το 2016. Σας παρακαλούμε να επικοινωνήσετε μαζί μας αν θέλετε αυτό το ενημερωτικό φυλλάδιο στα ελληνικά.

Caro residente, questo documento riguarda i lavori di potenziamento alla Brunswick Terminal Station che si concluderanno nel 2016. Vi preghiamo di contattarci per la versione italiana del foglio informativo.

You can contact the project team via email brunswickts@ausnetservices.com.au or phone **1800 4636 287**

Dust

Care is being taken to keep dust to a minimum. Measures employed to do this include keeping stockpiles away from boundaries, keeping construction activity to a minimum during times of high wind and making sure that vehicles transporting loose materials are covered. Wheel wash facilities are also in place to minimise any dirt or mud on surrounding roads.

Contamination

As with many old buildings, there is asbestos present in some of the buildings on site. This asbestos is being carefully managed and removed in line with the Construction Environmental Management Plan and EPA requirements.

Our Community Relations Team

AusNet Services is committed to continuing to work closely with our neighbours to minimise any disruption during the upgrade of the Brunswick Terminal Station.

We'll continue to provide regular project updates, as well as ongoing liaison with the surrounding community, local authorities and other stakeholders. Please contact us if you'd like a copy of our community commitments.
