

Richmond Terminal Station Upgrade

Newsletter 5 July 2016

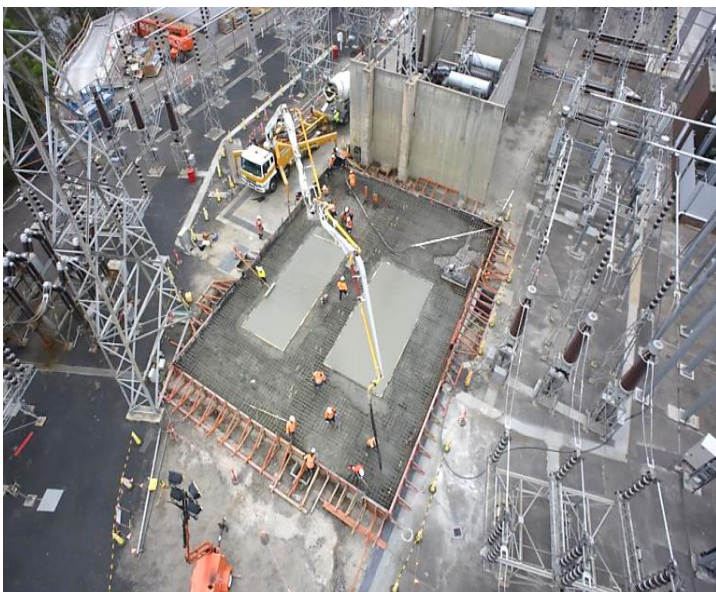

Hello again

It has been some time since we provided you with an update on our project – we are pleased to report significant progress with our works. As always we thank you for your ongoing patience and understanding during the period of the rebuild of the terminal station.

Project Works

Since our last newsletter we have established a number of major structures on site, including the construction of two new buildings – the 220kV building on the southern boundary and the first stage of the 66kV building near the eastern boundary of Allan Bain Reserve.

These works have seen a significant transformation of the site with some old infrastructure now removed and the new buildings with internal switchgear being built. When this process is completed, it will significantly improve the appearance of the site as a whole.

Concrete Pour for Transformer Slab

Transformer Delivery – May 2016

The delivery of a large transformer took place in the early hours of the morning of Monday 23rd May. Thank you to all local businesses and residents who complied with the parking restrictions necessary for both the delivery and the return journey of the transportation vehicle. Your cooperation is greatly appreciated and has ensured the safe delivery of this essential piece of equipment for the rebuild. The next transformer movement will be in early 2017.

New 220kV Building and Control Room

What will happen for the rest of 2016

Highlights will include:

- Demolition of part of old switchgear near Barkly Ave
- Completion of some 66kV connections to the local cable network
- Construction of the second stage of the new 66kV building – behind the net on Allan Bain Reserve
- Installation of the building façade on the new 220kV building – on the Yarra side of the site
- Installation of one of the new transformers

Recent works in Barkly Gardens and at the Coppin Street roundabout

For a number of months works have been conducted by distribution companies CitiPower and United Energy in Barkly Gardens and at the Coppin Street/ Barkly Avenue roundabout. These works are a necessary part of the rebuild of the terminal station and have the approval of Yarra Council.

It is expected that the roundabout works will be completed in July, and the works in the gardens in August. Following completion these areas will be fully reinstated.

If you have queries on this specific part of the project please contact Rory McSwiney (Multipipe-0418 -671 -521).

Mary Street Landscaping

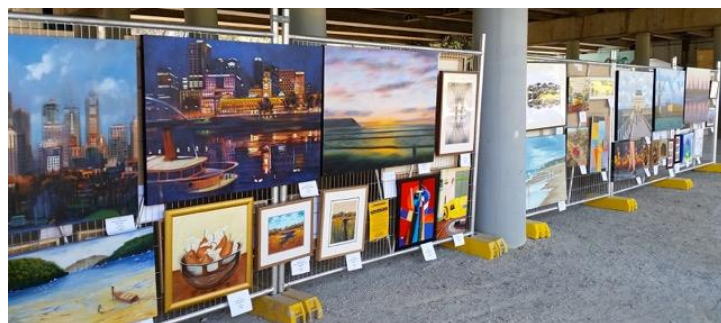

We are delighted with our recently completed landscaping in Mary Street. The new planting and path installation were carried out in association with, and with the approval of, Yarra Council and have significantly improved the nature strip area. This landscaping forms stage one of the approved plan for the Mary Street nature strip – Stage 2 will be completed towards the end of the project. For details of Stage 2 please refer to our project website.

Art at Burnley Harbour

AusNet Services has been very pleased to support the last 3 'Art at Burnley Harbour' shows, through sponsorship and assistance with the set-up of the shows. It has been great to be involved in this important local event. We hope to continue our involvement into the future.

Richmond Primary School

We continue to maintain a close relationship with Richmond Primary School, keeping the school up to date with project activity that may affect the school and Mary Street.

Our support of the school will continue throughout the works, with the safety of the pupils, staff and families always having our highest priority.

Further Information

Our aim is to always let you know in advance of important works that may affect the community. We also regularly update our website. Please do not hesitate to contact the Community team for further information on the project, or to provide us with feedback.
