
Accredited Service Providers Register (Option 2) – Distribution Electricity

HSEQ Management System

Document number:	QMS 21-01-1
Issue number:	103
Status:	Approved
Approver:	Kevin Foster
Date of approval:	18/05/2020

Accredited Service Providers Register (Option 2) – Distribution Electricity

1 PURPOSE

This register is provided on the basis that the customer has exercised their option (Option 2) in accordance with the electricity Distribution Code to seek alternative prices for the augmentation work associated with providing an electricity supply to their property.

AusNet Services does not provide any warranty in regard to the service providers included in this register. The service providers have met minimum electricity industry skill requirements to undertake the work. Inclusion on this register does not imply competency or capability beyond the minimum skill requirement. Nor does inclusion in the register imply any comment on the business skills and practices or quality of the service providers listed.

A customer using this register to seek quotes and subsequently engaging a service provider will need to ensure that the service provider is “accredited” for the particular type of work required. The customer will be directly entering into the contract to provide the services required with the service provider. AusNet Services will not engage the service provider on behalf of the customer.

1.1 ENQUIRIES

All enquiries about this register are to be forwarded to SupplierAccreditation@ausnetservices.com.au

1.2 ACCREDITATION RENEWAL

It is the responsibility of the accredited organisation to ensure that the accreditation is current. Where accreditations expire the organisation will be removed from the register.

Requests for renewal should be forwarded to SupplierAccreditation@ausnetservices.com.au and should be made at least 6 weeks before the expiry date allowing time for evaluation of submission.

2 ABBREVIATIONS AND DEFINITIONS

Term	Definition								
Accredited Service Provider	<p>An entity who DOES NOT have a contract for services with AusNet Services. The entity is accredited by AusNet Services and may be an individual, partnership, corporation, or other legal entity capable of providing services for customer initiated/managed works for electricity supply. The entity accreditation capability is listed in this register and may be for:</p> <ul style="list-style-type: none"> • Design / Engineering and Consultancy services • Installation • Construction • Maintenance and general services • Project management. 								
Accreditation Rating	<p>Accredited Service Providers have their performance rated at accreditation as follows:</p> <table border="1"> <thead> <tr> <th>Rating</th> <th>Description</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>Fully Competent - Has demonstrated capability to deliver works scope.</td> </tr> <tr> <td>2</td> <td>Proficient - Limited in competency - Has stated capability to deliver works scope but not yet demonstrated or infrequent user.</td> </tr> <tr> <td>3</td> <td>Capable - Yet to demonstrate competency - Recently accredited and has stated capability but has yet to demonstrate competency.</td> </tr> </tbody> </table>	Rating	Description	1	Fully Competent - Has demonstrated capability to deliver works scope.	2	Proficient - Limited in competency - Has stated capability to deliver works scope but not yet demonstrated or infrequent user.	3	Capable - Yet to demonstrate competency - Recently accredited and has stated capability but has yet to demonstrate competency.
Rating	Description								
1	Fully Competent - Has demonstrated capability to deliver works scope.								
2	Proficient - Limited in competency - Has stated capability to deliver works scope but not yet demonstrated or infrequent user.								
3	Capable - Yet to demonstrate competency - Recently accredited and has stated capability but has yet to demonstrate competency.								

Accredited Service Providers Register (Option 2) – Distribution Electricity

2.1 WORK TYPE DEFINITIONS

Note the following table describes the work types for Accredited Service Providers for Electricity Distribution only, for the full list of work types refer to QMS 21-01.

Work Type Code	Work Type Description
LV UG	LV Underground Cable Installation and jointing works.
HV UG	HV Underground Cable Installation and jointing works.
CH	Cable Hauling (refer to VEDN accreditation requirements). Civil works – Module 1: Installation of underground electrical infrastructure Laying Electricity Supply Industry (ESI) cables UETTDRJ21A.
HV/LV OH	HV/LV Overhead Line Construction, Open Wire and Pole Mounted Substation Construction. Includes all aspects of bare overhead construction works and LV servicing.
ABC/SC	HV LV ABC, Spacer cable Overhead Line Construction). Includes all aspects of the overhead ABC/SC construction works.
HV LW	HV Live work (22kV stick & or GB, 66kV stick, 220-500kV stick, Barehand)
G/T SS	Complex Substation Construction Ground type
K&P SS	Kiosk and Padmount Substation Installation, including earthing.
I/D SS	Complex Substation Construction Indoor
UGS	LV U/G Service Installation up to 4x50mm pole to pit
OHS	LV OH Service Installation up to 4x35mm, Service pole installation
FO	Fibre optic splicing and testing (OPGW and ADSS)
FOD	Fibre Optic Design, Installation and Testing (ADSS)
PL	Public Lighting – Bulk Light replacement only
UGC	Provision of installation of underground pits, cables and conduits, foundations, concrete slab, roadworks, substation earthing. No cable jointing capability (must be VEDN accredited for electrical networks).
COMM-GB	Communication: Ground based - Installation or maintenance of ground based only third party mobile communication devices at AusNet Services Infrastructure.
COMM-TA	Communication: Tower access - Installation or maintenance of ground or tower based third party mobile communication devices on or at AusNet Services Infrastructure.
EDB	Electrical Design Basic (distribution network) - LV URD, <5 Pole 22kV/LV, ABC extension works, < 5 pole asset relocation. Pole substation to 315kVA, Low voltage underground works.
EDC	Electrical Design Complex (distribution network) – Indoor Substation, 22kV OH & UG feeder design, 66kV design (preferred but not essential), >4 pole 22kV extension >4 pole HV asset alteration, Kiosk/ground/padmount substation including HV/LV URD, Pole substations > 315kVA, HV underground including asset relocations. HV ABC, Fibre optic design.
PLD	Public Lighting Design – to AusNet Services accepted design standard including clearances and electrical layout that satisfies relevant Australian Standard, includes drafting. Key staff to have obtained Vic Roads Luminary design accreditation (for Vic Roads Works).
PLD-L	Public Lighting Design – Luminary Only Limited public lighting design to calculation and determination of lighting levels only. Vic Road luminary design accreditation required for Vic Roads works.

Accredited Service Providers Register (Option 2) – Distribution Electricity

Work Type Code	Work Type Description
SV	Survey –Total Station data capture with a Design Software of a minimum of poles format (Npoles preferred) that meets AusNet Services design standards. All data including field notes must be stored and available upon request.
DR	Drafting submitted in an AutoCAD format that complies with AusNet Services drafting standards including correct use of Objective drawing management system.
ED	Electrical Detailing – Underground cables and conduits including field pick up and asset tracing to AusNet Services detailing standards
PS	Professional Services – can include auditors, consultants, IT specialists.
PMB	Project Management Basic – Person acting on behalf of a client to manage and coordinate all electrical construction activity. Refer documents QMS 21-01-4 and QMS 21-01F for further information.
PMC	Project Management Complex – Person acting on behalf of a client to manage and coordinate all electrical construction activity. Refer documents QMS 21-01-4 and QMS 21-01F for further information.

Accredited Service Providers Register (Option 2) – Distribution Electricity

3 ACCREDITED SERVICE PROVIDERS

NOTE: All projects must have a Project Manager who is appointed by the customer; refer to Section 4 of this document.
